Basic Web Application Usage

Full Screen Mode
The membership application user interface has been designed to take advantage of as much screen space as possible and minimize scrolling. This requires the internal user to be in Full Screen Mode. To enter Full Screen Mode strike <F11> on the keyboard. To leave Full Screen Mode strike <F11> again.

Tabbing
Navigation through the page can be accomplished through the use of the <TAB> key on the keyboard. In most cases tabbing is left to right, top to bottom and follows the same order as data entry would from printed forms.

<TAB> Move the cursor forward one screen element
<SHE<T><TAB> Move the cursor backward one screen element

Pull Down Menus
Pull down menus allow the user to select from a list of many options.

A pull down menu with no value selected.

A pull down menu with the list expanded.

A pull down list with the desired value selected.

A pull down list with the selection complete.
When selecting from long pull down menus, such as State or Country, it is possible to jump to the selected value using only the keyboard. For example, using the pull down menu above as an example we want to select Merchant Marines without using the mouse. With the cursor on the pull down menu hit the <M> key twice. The first strike of the <M> key brings up Marine Corps. The second strike of the <M> key brings up the next value in the list beginning with an ‘M’. In our example this is Merchant Marines.

Also note that while on a pull down menu striking the <ENTER> key will not affect any buttons on the screen associated with the key. The user must tab out of the pull down menu before striking <ENTER>.

**Radio Buttons**

Radio buttons are used when selection values are unique. In other words, the user may only select one value in the list.

- ♂ Male  ○ Female  ○ Unknown

When the user tabs into a list of radio buttons they may move from button to button using the left and right arrow keys on the keyboard. To select a button press the <SPACE BAR> while the cursor is on the desired button.

**WARNING:** Once the user makes a selection in a list of radio buttons they will not be able to turn the selection off. They may change the selection to another button but will be required to have a selection.

**Check Boxes**

Check boxes are used when selection values can contain more than one value. In other words, the user may select as many of the check boxes as desired.

- ✔ Member
- □ Net Prospect

When the user tabs into a list of check boxes they may move from box to box using the <TAB> key. To select a box press the <SPACE BAR> while the cursor is on the desired box.

**Calendars and Dates**

Capturing dates correctly is very important to the system. When entering the date it must be in one of the following formats:

- mm/dd/yyyy  eg: 03/23/2003
- mmddyyyy  eg: 03232003
It may be useful to use the following keyboard shortcuts:

Today’s Date   <\>
Next Day       <+>
Previous Day   <->

It is also possible to bring up a calendar in order to select the date. To bring up a calendar use the mouse to click on the calendar icon following the field. You may also tab out of the date field and onto the calendar icon and hit <ENTER> to open the calendar. The calendar icon is shown below.

The following is an example of the calendar that appears:

To advance forward one month click on the arrow to the right of the Month and Year as shown below:
To go back one month click on the arrow to the left of the Month and Year as shown below:

To select the desired date simply click on the day.

**Tool Tips**

Almost every field in the application has an associated Tool Tip. Tool tips appear when the mouse is left to hover briefly over the field. The tool tip then appears revealing important information concerning the field. Move the mouse away from the field and the tool tip disappears.
