Internet Service at DAV Convention Expo

To help exhibitors manage costs and plan efficiently, we recommend evaluating alternative solutions for your internet needs, as venue-provided services are being offered at premium rates.

Internet Service: Recommended Alternative

For standard connectivity needs, exhibitors are encouraged to use personal mobile hotspots or MiFi devices as a more economical alternative to venue-provided internet. Basic hotspot devices are generally sufficient for light usage such as lead retrieval, transactions, and general browsing, while higher-capacity devices (MiFi's) may be considered for booths with multiple users or demo requirements. Please review the guidance below when determining your requirements.

Internet Service: Venue's Exclusive Provider

If you prefer to secure internet service through the venue, please use the form accessed [Here](#). The deadline for orders based on the price points advertised on the form is July 17, 2026. If your booth number has not been assigned at the time you place your order, please list the name of your entity as registered with DAV. Order forms should be faxed to (407) 996-5866 OR emailed to Conventionsales@MTG-FL.com.
