Power and Audio Visual (AV) needs at DAV Convention Expo

To help exhibitors manage costs and plan efficiently, we recommend looking for alternative solutions for power needs, as Venue-provided services are being offered at premium rates. Please review the guidance below when determining your requirements.

Power Sourcing: Recommended Alternative

Power from the Venue's exclusive provider is available; however, the costs are excessive. For example, a 5 Amp Single Phase power source and power strip for the Expo using the in-house vendor would cost \$506.00 (includes discount for early ordering).

It is recommended that you purchase a portable power pack or charging station in advance which you can charge overnight in your hotel room for less than half of the cost assessed by the Venue's provider. When viewing items online, you will be able to identify the capacities and features that meet your power needs.

Power Sourcing: Venue's Exclusive Provider

If your booth requires dedicated electrical service, and you prefer to purchase power directly from the venue, please visit: [Encore Online Ordering](#)

Audiovisual (AV): Recommended Alternative

Venue-provided AV services can be expensive and are often unnecessary for standard booth setups. Exhibitors are encouraged to bring their own AV equipment—such as monitors, laptops, tablets, etc. as a cost-effective and flexible solution. These setups are typically sufficient for product displays, presentations, and demonstrations. *Please ensure all equipment complies with venue guidelines.*

Audio Visual (AV): Sourcing from Venue's Exclusive Provider

If you require AV services through the venue, please use the provided link [Encore Online Ordering](#).

*The Discount Code for ordering through Encore is **DAV26** and it expires on August 1. Please order early to get the 20% discount.*
